

Value Partners Fund Series Value Partners All China Bond Fund

NAV per unit : Class A USD Unhedged Acc - USD10.04

Fund size : USD21.1 million

December 2021

- Value Partners All China Bond Fund (the "Fund") primarily invests in fixed income securities issued by any central and/or local governments, government agencies, supra-nationals, banks or companies which are domiciled in the People's Republic of China ("PRC") or which exercise the predominant part of their business or economic activities in the PRC.
- The Fund is subject to concentration risk and emerging market risk as a result of the concentration of its investments in the PRC markets. The Fund may be more volatile than a broadly based fund as it is more susceptible to fluctuation in value resulting from adverse economic or political conditions in the PRC markets.
- The Fund may also invest in PRC interbank bond market and is therefore subject to regulatory risks and various risks such as volatility risk, liquidity risk, settlement and counterparty risk. The relevant rules and regulations on investment in the PRC interbank bond market are subject to change and may adversely impact the Fund.
- The Fund may invest in securities which may be unrated or below investment grade and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per unit of the Fund.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation by investing primarily in fixed income securities issued by any central and/or local governments, government agencies, supra-nationals, banks or companies which are domiciled in the People's Republic of China ("PRC"), or which exercise the predominant part of their business or economic activities in the PRC.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. Only debt securities including convertible bonds are stated in the top holdings table. 3. Classification is based on Global Industry Classification Standard (GICS). 4. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 5. Investors should note that Yield to worst is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors, nor does a positive yield imply a positive return. 6. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 7. Cash includes receivables and payables (except cash for collaterals and margins). 8. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 9. The assessment of each award category is based on 3 weighted criteria, and one weighted criterion based on feedback from private banking fund selectors. The weightings includes product performance (30%), asset gathering (20%), service competency/quality (20%) and fund selector feedback (30%). 10. The ranking for top investment houses in Asian G3 bonds is generated from the number of votes received from the top-rated analysts, economists, strategists, salespeople and traders, for investors in these institutions. The score is also subject to a weighting methodology determined by the rating of the individual casting the vote for the investor. A total of 430 different institutions were evaluated and shortlisted to produce the 2020 ranking. 11. The award reflects performance up to 31 Dec 2019.

Investors should note investment involves risk and past performance is not indicative of future results. Investors should refer to the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets, non-investment grade and unrated debt securities. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you.
