Fund size : USD251.6 million

Morningstar Rating™

As at 31-08-2023

August 2023

- Value Partners Asian Income Fund (The "Fund") invests primarily in Asian equity and/or fixed income securities including convertible bonds and to deliver lower portfolio volatility.
- The Fund is subject to concentration risk as a result of the concentration of its investments in the Asian markets. The Fund may be more volatile than a broadly based fund as it is more susceptible to fluctuation in value resulting from adverse conditions in the Asian market.
- The Fund may invest in small and mid-capitalization companies. The stocks of such companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalization companies in general.
- The Fund may invest in debt securities including those that are below investment grade/unrated, and may involve greater risks, including credit risk, issuer-specific risk, counterparty risk and sovereign debt risk. The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk. All these may expose the Fund to significant losses.
- Investment in fixed income securities may include contingent convertible bonds whose structure is innovative and untested. These instruments may be subject to conversion risk e.g. compulsory conversion by the issuer upon uncontrollable triggering events and hence the Fund may experience losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to maximize return and income by investing in Asian equities, Asian fixed income securities and other assets relating to Asian companies that are listed in Asia, or have registered offices in Asia or generate a predominant share of their sales and/or their profits in Asia. The Fund also aims to achieve lower portfolio volatility by actively screening and selecting a combination of lower volatility equities and fixed income securities.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

* © Morningstar 2023. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **1.** Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. **2.** The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. **3.** Annualized yield of MDIs Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. **4.** Equities are classified by country of listing and fixed income securities are classified by country of risk. **5.** Classification is based on Global Industry Classification Standard (GICS). **6.** Source: FactSet & Bloomberg. It refers to the weighted average of dividend yield (equities) & Yield to Worst (fixed income securities). **7.** Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. **8.** Cash: 1.6%, includes receivables and payables (except cash for collaterals and margins). **9.** The lowest credit rating assigned by one of the three major external agencies (S&P, Moody's or Fitch) will be used. Issuer rating may be used for unrated securities. **10.** Including bonds whose issuers do not seek credit ratings. **11.** The weighted average credit rating is derived by taking the weighted average of the credit rating for each underlying bond in the portfolio. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. **12.** The assessment of each award category is based on weighted criteria (covering product performance, asset gathering, service competency/quality and fund selector feedback) as defined by Asian Private Banker. **13.** Benchmark's top Mutual Funds are selected based purely on quantitative data in its BlueOnion fund database. The subset awards strategies who have demonstrated medium-to-long-term tangible outcomes without subjecting the investors to unnecessary risks. **14.** For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets.
