April 2025

- Value Partners Asian Innovation Opportunities Fund (the "Fund") invests predominantly in Asian equity and/or fixed income securities of companies that are related to innovative technologies or business innovations.
- The Fund's investments are concentrated in the Asian market and therefore subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty.
- The Fund is also subject to concentration risks due to its concentration in the sectors relating to innovative technology or business innovation. Such companies are characterised by relatively higher uncertainty and volatility in price performance when compared to other economic sectors.
- The Fund may invest in small and mid-capitalisation companies. The stocks of such companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.
- The Fund may invest in unrated or below investment grade bonds and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk.
- In respect of the distribution classes for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per unit of the Fund.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To maximise return and income by investing primarily (i.e. not less than 70% of its Net Asset Value) in Asian equity and/or fixed income securities relating to Asian companies that are listed, or have their registered offices in Asia or that generate a predominant share of their sales and/or their profits in Asia which are related to innovative technologies or business innovations including but not limited to information technology, consumption services, healthcare and financials.

Source: Value Partners, HSBC Institutional Trust Services (Asia) Limited, FactSet and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fi@vp.com.hk.

* © Morningstar 2025. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers are responsible for any damages or losses arising from any use of this information; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. As dividends may be paid out from capital, this may result in an immediate decrease in the NAV per share/unit and may reduce the capital available for the Fund for future investment and capital growth. Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the manager. The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Positive distribution yield does not imply positive return. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Please refer to the offering document further details including the distribution policy. 3. Equities are classified by country of listing and fixed income securities are classified by country of risk. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Source: FactSet & Bloomberg. It refers to the weighted average of dividend yield (equities) & Yield to Worst (fixed income securities). 6. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 7. Cash: 7.5%, includes receivables and payables (except cash for collaterals and margins). 8. The highest credit rating assigned by one of the three major external agencies (S&P, Moody's or Fitch) will be used. Issuer rating may be used for unrated securities. 9. The weighted average credit rating is derived by taking the weighted average of the credit rating for each underlying bond in the portfolio. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 10. Awards are based on historical data available on the Bloomberg Terminal, Mutual Funds (1 year) are measured by 1 year of historical pricing data, which measuring period was from 1 Oct 2022 to 30 Sep 2023, ranking is based on 1 year total return figure. 11. The award reflects performance up to 31 Dec 2019. 12. The Asset Benchmark Research Awards 2019 judged performance of top investment houses based on the number of votes from top-rated analysts, economists and strategists. 13. The award reflects performance up to 30 Sep 2018. 14. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets.
