

Value Partners Fund Series

Value Partners China A-Share Select Fund

NAV per unit: Class A RMB (CNH) – RMB17.99
Fund size : USD36.8 million (RMB262.0 million)

CIES Eligible[△]

September 2025

- Value Partners China A-Share Select Fund (The “Fund”) invests primarily in RMB-denominated equities in China.
- The Fund is also subject to concentration risk as a result of investing only in China. Adverse developments in such region may affect the value of the underlying securities in which the Fund invests. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund intends to invest predominantly in China A-shares directly, via its Manager’s RQFII quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk and risks associated with the Manager’s RQFII status. In addition, the RQFII policy and rules are relatively new and there may be uncertainty in implementation and such policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund and its primary investments are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The Fund may invest in debt securities including those that are below investment grade/unrated, and may involve greater risks, including credit risk, issuer-specific risk, counterparty risk and sovereign debt risk. The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk. All these may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To achieve long-term capital growth and income appreciation by predominately investing in RMB-denominated equities in the PRC utilizing the Manager’s RQFII quota.

Source: Value Partners, HSBC Institutional Trust Services (Asia) Limited, FactSet and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fi@vp.com.hk.

1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. Classification is based on Global Industry Classification Standard (GICS). 3. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 4. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 5. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 6. The award reflects performance up to 30 Sep 2018. 7. The award reflects performance up to 31 Dec 2017. 8. For Hong Kong investors only. Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets.
