

Value Partners China A-Share Select Fund

NAV per unit: Class A RMB (CNH) – RMB14.61

Fund size : USD95.9 million (RMB650.1 million)

30 June 2017

- Value Partners China A-Share Select Fund (The "Fund") invests primarily in RMB-denominated equities in China.
- The Fund is also subject to concentration risk as a result of investing only in China. Adverse developments in such region may affect the value of the underlying securities in which the Fund invests. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund intends to invest predominantly in China A Shares directly, via its Manager's RQFII quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk and risks associated with the Manager's RQFII status. In addition, the RQFII policy and rules are relatively new and there may be uncertainty in implementation and such policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund and its primary investments are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The Fund may invest in debt securities including those that are below investment grade/unrated, and may involve greater risks, including credit risk, issuer-specific risk, counterparty risk and sovereign debt risk. The fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk. All these may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To achieve long-term capital growth and income appreciation by predominately investing in RMB-denominated equities in the PRC utilizing the Manager's RQFII quota.

All fund information is as of 30 Jun 2017 unless otherwise stated. Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg. Performance in RMB, NAV to NAV, with dividend reinvested and net of all fees. 1. Classification is based on Global Industry Classification Standard (GICS). 2. The profile is based on market consensus forecast as derived from S&P Capital IQ and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Note that the manager's internal estimates may differ significantly from S&P Capital IQ and Bloomberg estimates. 3. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 4. Cash refers to net cash on hand excluding cash for collaterals and margins. 5. Performance shown is calculated based on the fund's since launch return. The fund was launched on 29 Oct 2014. 6. The fund may invest in financial derivative instruments ("FDI") for hedging purposes. In adverse situations, the fund's use of FDI may become ineffective in hedging and the fund may suffer significant losses. Each hedged share class will hedge the fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the fund's base currency may be higher than that of the equivalent class denominated in the fund's base currency. Risks associated with FDI include counterparty risk, credit risk and liquidity risk. Such exposure may lead to a high risk of capital loss. The AUD/CAD/EUR/GBP/HKD/NZD/USD Hedged Classes are not recommended for investors whose base currency of investment is not in the aforesaid currencies. 7. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the fund's NAV. If in any one year, the fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 8. The award reflecting performance as at December 2015.

For Singapore investors: The Fund is registered as a restricted foreign scheme in Singapore and will only be distributed to (i) institutional investors and (ii) accredited investors and certain other persons in Singapore in accordance with section 304 and 305 of the Securities and Futures Act. Value Partners Asset Management Singapore Pte Ltd, Singapore Company Registration No. 20080225G

For Swiss Qualified Investors: The sales prospectus, the Articles of Association, the Key Investor Information Document as well as the annual and semi-annual reports of the Fund are available free of charge from the Representative. Hong Kong and China stockmarkets extended their solid performance in the second quarter underpinned by strong corporate earnings results and robust macro data. Value Partners China A-Share Select Fund increased by 7.1% during the quarter. For reference, the Shanghai Composite Index dropped 0.9% while the CSI 300 Index gained 7.0%, respectively, over the same period.

China buoyed by signs of stabilising growth

A series of encouraging macro data signalled further stabilization in China’s economy. The official manufacturing Purchasing Managers’ Index stayed in expansionary territory in June for the 11th consecutive month while export surprised on the upside on the back of global trade recovery, rising 8.7% in May in USD terms. Meanwhile, China’s retail sales grew 10.7% from a year earlier in May, reflecting the continuous progress in China’s shift towards a consumption-driven economy.

Robust fundamentals in the first half of 2017 highlighted the strength in China’s economy, providing a window of opportunity for the policy makers to tackle deep-seated structural issues. In fact, such structural issues, including climbing debt levels and shadow banking, were cited as major reasons in Moody’s downgrade of China and Hong Kong’s sovereign credit ratings in late May. In light of the government’s policy bias tilts towards tightening to rein in leverage and financial risks, we expect a modest moderation in growth later this year. However, we believe that a sharp deceleration in growth is unlikely given a managed pace of tightening and the government’s policy priority to maintain growth at 6.5% this year.

Earnings growth as catalysts

The Hong Kong and China markets turned in a strong rally year-to-date on the back of recovering corporate earnings results. The recovery trend in earnings is evident – as compared to an earning contraction of 13% in the fourth quarter of 2016, earnings growth of MSCI China Index companies picked up to 7% year-on-year during the first quarter of 2017¹. Meanwhile, with recovering profitability and margin expansion, consensus earnings-per-share (EPS) growth of the MSCI China Index² is estimated to reach 15% for the whole year of 2017, providing impetus for market performance during the year.
