Value Partners Classic Fund

Fund size : USD996.9 million

Morningstar Rating^{™1} As at 31-03-2020

March 2020

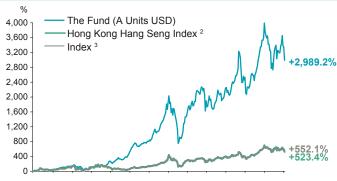

Value Partners Classic Fund (The "Fund") primarily invests in markets of the Asia-Pacific region, with a Greater China focus.

- The Fund invests in China-related companies and emerging markets which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in Asia-Pacific region, particularly China-related companies. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve consistent superior returns through an investment discipline that places emphasis on the fundamental value of potential investments, which the Manager believes are being traded at deep discounts to their intrinsic values. The Fund will concentrate on investing in the markets of the Asia Pacific region (particularly in Greater China region) but without fixed geographical, sectoral or industry weightings.
