November 2019

- China Convergence Fund (The "Fund") primarily invests in A and B-shares listed on the stock exchanges of Shanghai and Shenzhen as well as in H-shares listed in Hong Kong.
- The Fund invests in China and therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- The Fund may directly invest in A-shares and other eligible securities through the qualified foreign institutional investors ("QFII") quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk. In addition, the QFII policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

### Investment objective

The Fund aims to achieve long-term capital appreciation by investing primarily in equity securities of China-related companies. This includes securities listed on a Mainland China stock exchange, the Hong Kong Stock Exchange and major stock exchanges in other jurisdictions. The investable universe covers, but is not limited to A, B and H-shares as well as American Depositary Receipts.

1. © 2019 Morningstar, Inc. All Rights Reserved. 2. MSCI China Index (Price Return) since inception to 29 Mar 2001, thereafter it is the MSCI China Index (Total Net Return). 3. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 4. Classification is based on Global Industry Classification Standard (GICS). 5. The profile is based on market consensus forecast as derived from S&P Capital IQ and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Note that the manager's internal estimates may differ significantly from S&P Capital IQ and Bloomberg estimates. 6. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 7. Cash refers to net cash on hand excluding cash for collaterals and margins. 8. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 9. The award reflects the fund's 5-year performance up to 30 September 2018. 10. The award reflects performance up to 30 September 2018. 11. The award reflects performance up to 31 December 2017. 12. For Hong Kong investors only.
