- China Convergence Fund (The "Fund") primarily invests in A and B-shares listed on the stock exchanges of Shanghai and Shenzhen as well as in H-shares listed in Hong Kong.
- The Fund invests in China and therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- The Fund may directly invest in A-shares and other eligible securities through the qualified foreign institutional investors ("QFII") quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk. In addition, the QFII policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve long-term capital appreciation by investing primarily in equity securities of China-related companies. This includes securities listed on a Mainland China stock exchange, the Hong Kong Stock Exchange and major stock exchanges in other jurisdictions. The investable universe covers, but is not limited to A, B and H-shares as well as American Depositary Receipts.

However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. **3.** Classification is based on Global Industry Classification Standard (GICS). **4.** Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. **5.** Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. **6.** Cash includes receivables and payables (except cash for collaterals and margins). **7.** Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). **8.** The award reflects the fund's 5-year performance up to 30 Sep 2018. **9.** The award reflects performance up to 30 Sep 2018. **10.** The award reflects performance up to 31 Dec 2017. **11.** For Hong Kong investors only.
