

# Value Partners Greater China High Yield Income Fund

NAV per unit: USD15.63 (P Acc USD) / USD8.94 (P MDis USD)

Fund size : USD5,795.8 million

April 2018

- Value Partners Greater China High Yield Income Fund (the "Fund") primarily invests in a portfolio of fixed and floating rate bonds and other debt securities, including convertible bonds, in the Greater China region.
- The Fund may invest in high yielding securities which may be unrated or below investment grade and debt securities issued by special purpose vehicles. The Fund is therefore exposed to higher credit/insolvency risk and default risk.
- The Fund primarily invests in the Greater China region and therefore is subject to emerging market and concentration risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

## Investment objective

To provide capital appreciation to investors through primarily investing in Greater China debt securities including but not limited to high yield, convertible, and mainland Chinese offshore bonds.

## Commentary

### Portfolio review:

The Asian markets continued to soften in April amid the threat of a potential US-China trade war, rising US Treasury yield and a busy new issuance calendar. During the month, sovereign bonds underperformed as they are the most sensitive to movements in Treasury yields and global fund flow. In corporate bonds, high-grade issues slightly outperformed high-yield ones. While we remained quite active in both primary and secondary markets, we have raised our cash level to stay more defensive in the current environment and also to reserve some dry powder for use in certain interesting deals in the pipeline.

### Outlook:

In our view, while the market may remain soft in the face of political noises and a temporarily heavy supply pipeline, value in Asian credits, especially in China high-yield bonds, is emerging. Currently, the absolute yield of Chinese high-yield bonds is at a 2-year high, while the yield differentials between China high-yield bonds and US high-yield bonds is at the widest since September 2015. However, looking beyond the current turbulence, we see a fundamentally sound global economy and a gradual normalization in global risk-free rates, which are both constructive to credit investments. We will selectively deploy our capital into opportunities that offer an attractive risk-reward tradeoff.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only.

1. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 2. The Fund may invest in financial derivative instruments ("FDI") for hedging purposes. In adverse situations, the Fund's use of FDI may become ineffective in hedging and the Fund may suffer significant losses. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. Risks associated with FDI include counterparty risk, credit risk and liquidity risk. Such exposure may lead to a high risk of capital loss. The AUD/CAD/EUR/GBP/NZD/SGD Hedged Classes are not recommended for investors whose base currency of investment is not in the aforesaid currencies. 3. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as of ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 6. Cash refers to net cash on hand excluding cash for collaterals and margins. 7. Investors should note that Yield to worst is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors, nor does a positive yield imply a positive return. 8. Including bonds whose issuers do not seek credit ratings (Greater China Paper 14.3%; Equity-linked Investments 10.0%; Others 4.2%; Loan 3.2%; Mongolia Bonds 1.4%; Dim Sum Bonds 0.8%). 9. Announced in Oct 2017 by The Asset Benchmark Research in the Asian G3 Bond Benchmark Review, which ranks the Top Investment Houses (Hedge Funds category) based on the number of votes won by their astute investors. All votes are subject to a weighting methodology. 10. The awards were judged based on performance over the past 12 months, up to 30 Apr 2017. 11. The period covered by the awards is from 1 Jan 2016 to 31 Dec 2016. 12. For Hong Kong investors only.
