

Value Partners Greater China High Yield Income Fund

NAV per unit: USD15.93 (P Acc USD) / USD8.28 (P MDIs USD)

Fund size : USD6,708.1 million

May 2019

- Value Partners Greater China High Yield Income Fund (the "Fund") primarily invests in a portfolio of fixed and floating rate bonds and other debt securities, including convertible bonds, in the Greater China region.
- The Fund may invest in high yielding securities which may be unrated or below investment grade and debt securities issued by special purpose vehicles. The Fund is therefore exposed to higher credit/insolvency risk and default risk.
- The Fund primarily invests in the Greater China region and therefore is subject to emerging market and concentration risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation by primarily investing in Greater China debt securities, including but not limited to high yield, convertible and mainland Chinese offshore bonds.

Commentary

Portfolio review:

The U.S.-China trade talks went into stalemate in May, with the U.S. imposing additional tariffs on Chinese goods before it went beyond trade to pursue a global ban on Chinese tech giant Huawei Technologies. Risk appetite took a deep dive and flight-to-quality sentiment drove money to safer assets such as U.S. Treasuries, U.S. dollar and Japanese yen. Benchmark 10-year Treasury yield hit a one-year low and ended the month around 2.14%¹. During the month, investment-grade issues outperformed high-yield ones. Investors' preference for yield is still very prominent, lending support to the overall credit market. We continue to be very active in both the primary and secondary markets, and we see the recent weakening as a good entry point to buy some of our conviction names at a cheaper valuation.

Outlook:

We see little chance that a trade deal between the U.S. and China will be struck around the G20 meeting in late June. Investors should prepare for a long-drawn-out process in this matter. In our view, with or without a trade deal, the continuous conflict between the U.S. and China is becoming a "new normal" as the two nations battle for global supremacy on economic, geopolitical and technological fronts. For our strategies, market uncertainty will give us abundant opportunities in leveraging our bottom-up research capability in less-researched and less-followed names to produce tremendous alpha to the portfolio. We will continue to deploy our capital to capture opportunities that offer attractive risk-reward potential.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only.

1. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 2. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The AUD/CAD/EUR/GBP/NZD/SGD Hedged Classes are not recommended for investors whose base currency of investment is not in the aforesaid currencies. 3. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 6. Cash refers to net cash on hand excluding cash for collaterals and margins. 7. Investors should note that the Yield to worst figure is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors. A positive yield does not imply a positive return. 8. Including bonds whose issuers do not seek credit ratings (Greater China Paper 12.0%, Equity-linked Investments 6.3%, Others 3.7%, Loan 2.8%). 9. The average credit rating is calculated by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The letter rating may be based on bond ratings from different agencies and is provided to indicate the average credit rating of the portfolio's underlying bonds without taking into account derivative positions and unrated securities. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 10. The award reflects the fund's 3 and 5-year performance up to the end of 2018. 11. The award reflects performance up to 30 September 2018. 12. The award reflects the fund's 3 and 5-year performance up to 30 September 2018. 13. For Hong Kong investors only.
