

Value Partners Greater China High Yield Income Fund

NAV per unit: USD16.44 (P Acc USD) / USD8.00 (P MDis USD)

Fund size : USD5,628.1 million

February 2020

- Value Partners Greater China High Yield Income Fund (the "Fund") primarily invests in a portfolio of fixed and floating rate bonds and other debt securities, including convertible bonds, in the Greater China region.
- The Fund may invest in high yielding securities which may be unrated or below investment grade and debt securities issued by special purpose vehicles. The Fund is therefore exposed to higher credit/insolvency risk and default risk.
- The Fund primarily invests in the Greater China region and therefore is subject to emerging market and concentration risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation by primarily investing in Greater China debt securities, including but not limited to high yield, convertible and mainland Chinese offshore bonds.

Commentary

Portfolio review:

Global markets melted down in February as the outbreak of COVID-19 worsened. All risk assets sold off with the S&P 500 down more than 8%. In terms of price, Asian high yields closed down half a percentage point and a flat total return including carry. Meanwhile, emerging market currencies were down 3 to 4%. Even gold prices dropped by more than 4% intra-month before finishing flat. The only winners for the month were the perceived safe assets in the market – US Treasuries and investment grade issues. During the month, we focused on liquidity management. We mostly took profit on names that had their run over the course, alongside selective buying on names that were beaten down and were offered at attractive valuations. Overall, trade flow was orderly and we did not see much forced selling activity.

Outlook:

We expect COVID-19 to remain, and cast a shadow on the market in the near future. While signs emerged that cases in China may be plateauing, we think infections outside of China are just beginning to skyrocket. Western countries that were spared the experience of the severe acute respiratory syndrome (SARS) outbreak in 2003 may underestimate the impact of Covid-19 and therefore not adequately prepared for an outbreak. We have already seen the damage to both the financial markets and the real economy as China's recent manufacturing gauge slumped to an all-time low of 35.7 in February 2020. Since it is our view that COVID-19 is transitory, the Chinese economy should rebound quickly once the virus subsides. Hence we remain cautiously optimistic about Asian credits in 2020, particularly Chinese credits.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 2. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 3. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 6. Cash refers to net cash on hand excluding cash for collateral and margins. 7. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 8. Investors should note that the Yield to worst figure is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors. A positive yield does not imply a positive return. 9. Including bonds whose issuers do not seek credit ratings (Greater China Paper 21.2%; Equity-linked Investments 4.4%; Others 2.6%; Loan 2.5%). 10. The average credit rating is calculated by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. The letter rating may be based on bond ratings from different agencies and is provided to indicate the average credit rating of the portfolio's underlying bonds without taking into account derivative positions and unrated securities. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 11. The award reflects the fund's 3 and 5-year performance up to the end of 2018. 12. The award reflects performance up to 30 September 2018. 13. The award reflects the fund's 3 and 5-year performance up to 30 September 2018. 14. For Hong Kong investors only. The views expressed are the views of Value Partners Hong Kong Limited ("VPHK") only and are subject to change based on market and other conditions. The information provided does not constitute investment advice and it should not be relied on as such. All materials have been obtained from sources believed to be reliable, but their accuracy is not guaranteed. This material contains certain statements that may be deemed forward-looking statements. Please note that any such statements are not guarantees of any future performance and actual results or developments may differ materially from those projected. Investors should note investment involves risk and past performance is not indicative of future results. Investors should refer to the explanatory memorandum for details and risk factors in particular those associated with investment in Greater China markets in the Asian region, non-investment grade and unrated debt securities and debt securities issued by special purpose vehicles. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you. For Singapore investors: The Fund is registered as a restricted foreign scheme in Singapore and will only be distributed to (i) institutional investors and (ii) accredited investors and certain other persons in Singapore in accordance with section 304 and 305 of the Securities and Futures Act.
