

Value Partners High-Dividend Stocks Fund

NAV per unit: Class A1 USD - USD88.28 | Class A2 MDIs USD - USD10.29

Fund size : USD2,187.0 million

Morningstar Rating™¹
As at 31-01-2020

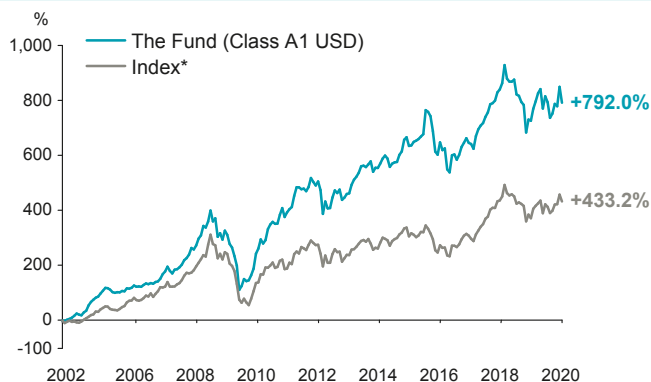

January 2020

- Value Partners High-Dividend Stocks Fund (The "Fund") primarily invests in higher yielding debt and equity securities in the Asian region.
- The Fund may invest in higher-yielding debt and equity securities that are below investment grade. Such investments can involve greater risks due to the speculative nature.
- The Fund may invest in China and other markets of the Asian region, therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation to unitholders by investing primarily in a portfolio of relatively higher yielding equity and debt securities in Asian region.

* Index refers to MSCI AC Asia Pacific (ex-Japan) Index (Total Net Return) up to 30 Apr 2016, thereafter it is the MSCI AC Asia (ex-Japan) Index (Total Net Return) due to a change in investment profile. MSCI (Total Net Return) Indices takes into account of dividend reinvestment after deduction of withholding tax.

[^] Annualized return and volatility are calculated from inception based on published NAV. Volatility is a measure of the theoretical risk in terms of standard deviation; in general, the lower the number, the less risky the investment, and vice versa.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. © 2020 Morningstar, Inc. All Rights Reserved (for Class A1). 2. The Manager currently intends to make monthly dividend distribution in respect of the A2 MDis Classes; actual dividend payout will be subject to the Manager's discretion. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. For A1 Class units, Manager will review dividend distribution at its discretion once a year (last dividend payout date: 21 Nov 2005). Please refer to the explanatory memorandum for more details. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 4. The receiving bank may charge a fee for incoming payments. Such fees will reduce the actual amount of dividends received by the investor. 5. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 6. Investors should note that the base currency of the Fund is in USD. The HKD equivalent NAV per unit is for reference only and should not be used for subscription or redemption purpose. Conversion to the base currency of the Fund will normally take place at the prevailing rate (as determined by the Fund's Trustee or Custodian) on the corresponding fund dealing day. Investors should be aware of possible risks resulting from fluctuations of exchange rates against USD. 7. Classification is based on Global Industry Classification Standard (GICS). 8. The profile is based on market consensus forecast as derived from S&P Capital IQ and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Note that the manager's internal estimates may differ significantly from S&P Capital IQ and Bloomberg estimates. Investors should note that all yield figures are for reference only and do not represent the actual performance of the Fund or the dividend yield received by investors; nor does a positive yield imply a positive return. "Dividend yield" is calculated based on the equity portion of the Fund, whereas "Yield to maturity/put" is calculated based on the debt portion of the Fund by taking the average of yields of individual holdings (being the higher of the yield to maturity and yield to put of each bond/convertible bond) after excluding event-driven investment with extremely high yield. 9. Exposure refers to net exposure (long exposure minus short exposure). Due to rounding, percentages shown may not add up to 100%. 10. Cash refers to net cash including cash equivalents, investment in money market funds but excluding cash for collaterals and margins. 11. Performance fee will only be charged if at the end of the financial year the NAV (before deduction of performance fee and relevant distributions) exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV for the accumulation classes (and dividend adjusted equivalent for distribution paying classes). If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 12. The award reflects performance up to 30 September 2018. 13. The award reflects performance up to 31 December 2017. 14. The award recognises listed companies that were able to demonstrate outstanding business performance, create value for investors and showcase strong corporate governance over the past year. The award was bestowed on 5 November 2018. 15. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets.
