- Value Partners High-Dividend Stocks Fund (The "Fund") primarily invests in higher yielding equity and debt securities in the Asian region.
- The Fund may invest in higher-yielding equity and debt securities that are below investment grade. Such investments can involve greater risks due to the speculative nature.
- The Fund may invest in China and other markets of the Asian region, therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

### Investment objective

The Fund aims to provide capital appreciation to unitholders by investing primarily in a portfolio of relatively higher yielding equity and debt securities in Asian region.
