- Value Partners Japan REIT Fund (the "Fund") invests primarily in real estate investment trusts ("REITs") listed in Japan.
- The Fund is subject to concentration risk as a result of the concentration of its investments in the Japanese real estate sector. The Fund may be more volatile than other broad-based funds.
- Investing in REITs may also involve risks associated with the ownership of real estate, as well as other risks e.g. operation and management risk, interest rate risk, liquidity risk, regulatory risk and leverage risk.
- The Fund may also invest in financial derivative instruments for both hedging and investment purposes. These instruments can be highly volatile and expose investors to increased risk of loss.
- In respect of the distribution units for the Fund, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund at the Manager's discretion. This amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units of the relevant distribution units.
- The Fund is not authorized by the SFC under the Code on Real Estate Investment Trust but is authorized under the Code on Unit Trusts and Mutual Funds, such authorization does not imply official recommendation. You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To provide long-term capital appreciation and income generation primarily through investment in real estate investment trusts ("REITs") listed (including REITs initial public offerings) in Japan.

Source: Value Partners, HSBC Institutional Trust Services (Asia) Limited, FactSet and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. As dividends may be paid out from capital, this may result in an immediate decrease in the NAV per share/unit and may reduce the capital available for the Fund for future investment and capital growth. Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the manager. The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Positive distribution yield does not imply positive return. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Please refer to the offering document further details including the distribution policy. 3. Classification is based on Global Industry Classification Standard (GICS). 4. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 5. Cash includes receivables and payables (except cash for collaterals and margins). 6. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results.
