A brand new investment strategy since June 2018

NAV per unit: Class A Acc USD: USD10.88

Fund size : USD64.3 million

March 2019

- Value Partners Multi-Asset Fund (The "Fund") aims to achieve capital growth by investing across a range of asset classes and currencies globally including equities, debt securities, commodities, collective investment schemes, listed exchange traded funds ("ETFs"), real estate investment trusts ("REITs") and money market instruments which are primarily linked to the global trend of economies.
- The Fund adopts a dynamic asset allocation strategy which may be periodically rebalanced and therefore the Fund may incur greater transaction costs than a fund with static allocation strategy.
- The Fund may invest in small and mid-capitalization companies and emerging markets and therefore subject to higher volatility and lower liquidity in general.
- The Fund may invest in debt securities which may be unrated or below investment grade and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk, and may expose the Fund to significant losses.
- The Fund may invest in contingent convertible bonds which are risky and highly complex instruments. These instruments may be subject to conversion risk e.g. compulsory conversion by the issuer upon uncontrollable triggering events and hence the Fund may experience losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.
