October 2020

- Chinese Mainland Focus Fund (The "Fund") invests primarily in investments which are related to mainland China.
- The Fund invests in China-related companies which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- Investing in China exposes the Fund to additional risks including currency repatriation risk, uncertainty of taxation policies and risk associated with StockConnects, RQFII Quota, SME board, ChiNext market and/or the STAR board. The Fund may also expose to RMB currency and conversion risk.
- Investing in small/mid-capitalization securities may have lower liquidity and their prices are more volatile to adverse economic developments.
- It is possible that the entire value of your investment could be lost. You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve medium to long-term capital appreciation by focusing on investments related to mainland China. This includes RMB-denominated corporate and government bonds, listed or unlisted shares issued by companies whose assets and/or revenues are principally denominated in RMB and/or whose costs or liabilities are principally denominated in US dollars. The investable universe can also cover A, B and H-shares.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. MSCI China Index (Total Net Return) which takes into account of dividend reinvestment after deduction of withholding tax. 2. Classification is based on Global Industry Classification Standard (GICS). 3. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. 4. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 5. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 6. Cash includes receivables and payables (except cash for collaterals and margins). 7. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 8. The award reflects the fund's 10-year performance up to the end of 2017. 9. The award reflects performance up to 30 Sep 2018. 10. The award reflects performance up to 31 Dec 2017. 11. For Hong Kong investors only.
