

# Chinese Mainland Focus Fund

## A Sub-Fund of Value Partners Intelligent Funds

NAV per unit: Class A - USD100.27

Fund size : USD270.4 million

Morningstar Rating™  
As at 31-05-2021

May 2021

- Chinese Mainland Focus Fund (The "Fund") invests primarily in investments which are related to mainland China.
- The Fund invests in China-related companies which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- Investing in China exposes the Fund to additional risks including currency repatriation risk, uncertainty of taxation policies and risk associated with StockConnects, RQFII Quota, SME board, ChiNext market and/or the STAR board. The Fund may also expose to RMB currency and conversion risk.
- Investing in small/mid-capitalization securities may have lower liquidity and their prices are more volatile to adverse economic developments.
- It is possible that the entire value of your investment could be lost. You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

### Investment objective

The Fund aims to achieve medium to long-term capital appreciation by focusing on investments related to mainland China. This includes RMB-denominated corporate and government bonds, listed or unlisted shares issued by companies whose assets and/or revenues are principally denominated in RMB and/or whose costs or liabilities are principally denominated in US dollars. The investable universe can also cover A, B and H-shares.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. MSCI China Index (Total Net Return) which takes into account of dividend reinvestment after deduction of withholding tax. 2. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 3. Classification is based on Global Industry Classification Standard (GICS). 4. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. 5. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 6. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 7. Cash includes receivables and payables (except cash for collaterals and margins). 8. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 9. The awards recognize the top performing Greater China Equity funds, issued by CAMAHK members with at least 1 year of historical performance as of 30 Sep 2020. The Best Total Return calculation methodology, Bloomberg calculates the customized 1 year, 3 years and 5 years total return using Bloomberg calcroute field "RT095-Custom Total Return Holding Period". 10. The award reflects the fund's 10-year performance up to the end of 2017. 11. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets.
