January 2019

- Value Partners Taiwan Fund (The "Fund") invests primarily in companies established in Taiwan or which derive a majority of their revenue from business related to Taiwan.
- The Fund may invest in Taiwan and therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty which may adversely affect volatility and market liquidity.
- The Fund is also subject to concentration risk due to its concentration in Taiwan-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve long term capital growth through primarily investing in equity and equity linked securities of companies that are listed on (a) the Taiwan Stock Exchange; or (b) the GRE Tai Securities Market; or (c) any stock exchange but which have their main operations or majority of assets in or derive the majority of their income from Taiwan. This includes companies incorporated and/or quoted outside Taiwan.
