Value Partners Asian Dynamic Bond Fund

A Sub-Fund of Value Partners Ireland Fund ICAV A UCITS-Compliant Fund NAV per unit : Class V USD Unhedged Acc - USD8.51

Fund size

: USD4.3 million

March 2024

- Value Partners Asian Dynamic Bond Fund (The "Fund") invests primarily in a portfolio of debt securities issued by any Asia Pacific Region governments and/or government related entities, supra-nationals, banks or companies which have their main operations in, or a majority of their income derived from the Asia Pacific Region.
- The Fund may invest in high yielding, unrated or below investment grade securities. The Fund is therefore exposed to higher credit/insolvency risk and default risk.
- The Fund may also invest in contingent convertible bonds ("CoCos") having unique equity conversion, principal write-down or coupon cancellation features which are tailored to the issuing banking institution and its regulatory requirements. In the case such triggers or features are invoked, the Fund may lose some or all of its original investment.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund. You should not make investment decision on the basis of this marketing material alone. Please read the prospectus for details and risk factors.

Investment objective

The Fund aims to provide a total return, consisting of income and capital growth over the medium to long term, by investing primarily in a portfolio of debt securities issued by any Asia Pacific Region governments and/or government related entities, supra-nationals, banks or companies which have their main operations in, or a majority of their income derived from the Asia Pacific Region.
