Content

- Please pay particular attention to the risk of investment in China and other markets in the Asian region and in companies with medium or small capitalization. The value of the funds can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- Value Partners High-Dividend Stocks Fund and Value Partners Greater China High Yield Income Fund may invest in higher-yielding debt and equity securities that are below investment grade; additionally, Value Partners Greater China High Yield Income Fund may invest in debt securities issued by special purpose vehicles. Such investments can involve material risks, e.g. counterparty risk, liquidity risk, credit risk and default risk, and may expose the Fund to significant losses.
- Investors should note that there is no guarantee that the underlying securities in Value Partners High-Dividend Stocks Fund and Value Partners Greater China High Yield Income Fund will pay out dividends. Therefore, there is no guarantee that those funds' investment strategies will succeed. There is also no guarantee of dividend or distribution payments during the period an investor holds units in such funds, and a positive dividend yield does not represent/imply positive return.
- Value Partners China A-Share Select Fund intends to invest predominantly in China A Shares directly, via its Manager's RQFII quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk and risks associated with the Manager's RQFII status. In addition, the RQFII policy and rules are relatively new and there may be uncertainty in implementation and such policy and rules are subject to change. All these may adversely impact the fund. The fund and its primary investments are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The funds may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the funds to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

★★★★
Morningstar Rating™
As at 31-01-2021

January 2021

- Value Partners Classic Fund (The "Fund") primarily invests in markets of the Asia-Pacific region, with a Greater China focus.
- The Fund invests in China-related companies and emerging markets which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in Asia-Pacific region, particularly China-related companies. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve consistent superior returns through an investment discipline that places emphasis on the fundamental value of potential investments, which the Manager believes are being traded at deep discounts to their intrinsic values. The Fund will concentrate on investing in the markets of the Asia Pacific region (particularly in Greater China region) but without fixed geographical, sectoral or industry weightings.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

* © Morningstar 2021. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. Hang Seng Price Return Index was used till 31 Dec 2004, thereafter it is the Hang Seng Total Return Index. Hang Seng Total Return Index takes into account of dividend reinvestment whereas Hang Seng Price Return Index does not. 2. Index refers to Hang Seng Index (Price Return) since fund inception till 31 Dec 2004, thereafter it is the Hang Seng Index (Total Return) up to 30 Sep 2017. Hang Seng Index (Total Return) includes dividend reinvestment whereas Hang Seng Index (Price Return) does not take into account reinvestment of dividends. With effect from 1 Oct 2017, it is the MSCI Golden Dragon Index (Total Net Return), which takes into account of dividend reinvestment after deduction of withholding tax. 3. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 4. Investors should note that the base currency of "C" Units is in USD. The HKD is for reference only and should not be used for subscription or redemption purpose. Conversion to the base currency of "C" Units will normally take place at the prevailing rate (as determined by the Fund's Trustee or Custodian) on the corresponding fund dealing day. Investor should be aware of possible risks resulting from fluctuations of exchange rates against USD. 5. The Manager currently intends to make monthly dividend distribution in respect of the C Unit MDis Classes; actual dividend payout will be subject to the Manager's discretion. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the explanatory memorandum for more details. 6. The receiving bank may charge a fee for incoming payments. Such fees will reduce the actual amount of dividends received by the investor. 7. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 8. Classification is based on Global Industry Classification Standard (GICS). 9. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 10. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. 11. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 12. Cash includes receivables and payables (except cash for collaterals and margins). 13. Performance fee will only be charged if at the end of the financial year the NAV (before deduction of performance fee and relevant distributions) exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV for the accumulation classes (and dividend adjusted equivalent for distribution paying classes). If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 14. The award is presented to fund products, fund management institutions, and related fund managers who have raised capital from both public and private overseas sectors. The award honors the long-term and stable performance profitability of institutions and fund managers, while also taking into account the fund performance and risk management capability of fund institutions and fund managers in the medium to long-term (one to three years). 15. The award reflects performance up to 30 Sep 2018. 16. The award reflects performance up to 31 Dec 2017. 17. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. Value Partners Classic Fund Commentary / Fourth Quarter 2020

- Value Partners Classic Fund (The “Fund”) primarily invests in markets of the Asia-Pacific region, with a Greater China focus.
- The Fund invests in China-related companies and emerging markets which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in Asia-Pacific region, particularly China-related companies. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Chinese equity market in 2020 has been extraordinary – first hit by the unprecedented epidemic impacts, which caused the first economic contraction on record, then a V-shape recovery after successful virus control, putting China back on its pre-COVID growth path by the end of the year. This peculiar backdrop formed a significant tailwind for equity market performance. The Fund and the benchmark MSCI Golden Dragon Index finished 2020 with a 37.6% and 28.2%¹ increase, respectively. During the quarter, the Fund returned 26.3%, outperforming the benchmark index’s 14.1% rise.

Domestic strength and accommodative policies: the mainstay of recovery

China was the first to lock down as the COVID epidemic unfolded but opened up sooner and has managed to secure growth in major macro indicators. After the deepest contraction of GDP in history in the first quarter, the country’s YoY economic growth returned to the positive territory in the third and fourth quarter, concluding full year 2020 with 2.3% GDP growth vitality supported by domestic-led economy activities².

The easing of both monetary and fiscal policies were implemented timely to secure a swift rebound. Although tapering noise arose as the People’s Bank of China hinted at a gradual and flexible counter-cyclical tightening towards the end of December, in our view, a sudden turn in policy direction is an unlikely event as a flexible approach is necessary to support the ongoing economic recovery.

A pause on geopolitics?

Geopolitical tension was another key event in 2020 as relations turned strained when the U.S. takes aim at the giant Chinese tech firms and introduced investment restrictions in Chinese related companies. Following the White House’s power transition, we take a cautiously optimistic stance as we expect a more open platform for discussion but a low likelihood of a complete reversal of policies implemented during Trump’s presidency. Thus, China taking a domestic-oriented approach in its dual-circulation agenda is sensible as it builds a more self-reliant economy, which helps to manage growth volatility induced by external uncertainties going forward.

Portfolio strategy review

The market plummeted in the first quarter as economic activities were brought to a halt due to the lockdown around the globe. Our overweight position in companies that are under structural growth trends, such as consumption upgrade, e-commerce, education, healthcare and technology hardware, was also hit but became the leading performers in full-year 2020, supported by the domestic-led V-shape economic

recovery. In particular, our core exposure to the e-commerce platforms delivered solid earnings results quarter after quarter, with China's spending behavior shifting from offline to online amid pandemic. In the second half of the year, our tilted focus towards services-oriented e-commerce platforms was rewarding as we anticipated fierce competition and moderated growth outlook among merchandized platforms, a trend that became apparent in the fourth quarter. On the other hand, our exposure to the premium baijiu names demonstrated their strong brand value as sales and unit price swiftly rebounded to the pre-pandemic levels in the second quarter. Other contributors included our holdings in Taiwanese technology hardware manufacturers and Chinese education operators. The former were among the beneficiaries following the strong demand for electronic devices under an accelerated digitalization and the rollout of 5G. The latter benefitted from its defensive nature and the favorable policies announced by the Chinese authorities. Policy reforms within the healthcare sector continued to yield positively and fueled our core holding in a leading biotech company in China, which recorded a stellar performance during the period.

Investment case: Pinduoduo (PDD US)

Pinduoduo operates an e-commerce platform, where offers value-for-money merchandise and interactive shopping options. Resembling a virtual bazaar, the platform sells a suite of product categories from apparel and shoes to fresh produce and electronic appliances.

To assess Pinduoduo's investment case, we used the web crawler to browse numerous sites methodically, conducted interviews with users and more than 100 merchants, and carried out field research in multiple locations. Our channel check has led us to the findings that Pinduoduo enjoys incredible differentiation in the fresh produce delivery category.

In selling fresh produce on the e-commerce platform, the key challenges are often the limited shelf life and the last-mile delivery, which is highly time-constrained. To overcome these hindrances, Pinduoduo launched an eco-system that collaborates with widely-found mom-and-pop stores for last-mile delivery. Customers could pick up packages from the local shops while the platforms enjoy substantial cost benefits. We expected the daily active user (DAU), shopping frequency, and gross merchandise value (GMV) of Pinduoduo to go up rapidly, forming a substantial competitive edge over its competitor, China's biggest e-commerce platform. This had become a more compelling investment when the DAU of Pinduoduo surpassed that of the e-commerce giant by 30%³. In addition, the centralized stocking and refill also enhance efficiency, a breakthrough that enables increasing user base and profitability, thus forming a solid investment case in our portfolio in 2020.

Outlook

We believe the worst of the pandemic is behind us. The anticipated vaccine shall gradually unlock the reopening and recovery process in 2021. A more stable outlook and accommodative policies will help anchor investor confidence and the market shall see risk appetite to staying level in 2021. The broader recovery would harmonize the uneven recovery path we have seen through 2020 and more balanced sector returns are expected in 2021.

In the context of China equities, we believe some structural trends that we identified before the COVID-19 hit continue to shape the economic transitioning and enable us to pick future winners. Thus, our convictions toward mainland Chinese companies remain intact and we foresee that China's effective handling of the pandemic, pivotal sector pillars and solid directions of economic development will play out and support the brighter outlook for 2021.

Value Partners Classic Fund: 10 biggest holdings of securities as at 31 December 2020

Stock	Industry	Valuation (2021 Estimates)	Remarks
Kweichow Moutai (Code: 600519 CH) Market cap: US\$384.5 billion	Food, Beverage and Tobacco	Price: CNY1,998.0 P/E: 48.4x P/B: 14.1x Yield: 1.1%	Kweichow Moutai is China's largest liquor manufacturer in terms of market value. With its premium brand positioning and effective channel management, Moutai has successfully expanded its market share in private consumption in the past years after a considerable decline in official consumption. Moutai has a distinguished brand among other players in China and is expected to benefit from the consumption upgrade cycle.
Pinduoduo (Code: PDD US) Market cap: US\$218.6 billion	Retailing	Price: US\$177.7 P/E: 452.7x P/B: 47.6x Yield: 0.0%	Pinduoduo operates an e-commerce platform, where offers value-for-money merchandise and interactive shopping options. Resembling a virtual bazaar, the platform sells a suite of product categories from apparel and shoes to fresh produce and electronic appliances.
Taiwan Semiconductor Manufacturing (Code: 2330 TT) Market cap: US\$489.1 billion	Semiconductors and semiconductor equipment	Price: TWD530.0 P/E: 26.3x P/B: 6.8x Yield: 2.1%	Taiwan Semiconductor Manufacturing is a world-class independent semiconductor foundry. It provides integrated circuit (IC) design houses with integrated services for process design, wafer manufacturing and testing. As a global leader with more than 50% share of the outsourcing market, the Company has consistently outperformed competitors in terms of technology and profitability. We think the Company is well-positioned to continue to benefit from the growing IC manufacturing outsourcing market and the rising demand for the Internet of things trend, AI chips and new application areas.
Tencent Holdings (Code: 700 HK) Market cap: US\$697.7 billion	Media and Entertainment	Price: HK\$564.0 P/E: 30.0x P/B: 6.5x Yield: 0.3%	Tencent is a leading provider of online games, premium messaging services, internet value-added services, and advertising and e-commerce services in China. By leveraging its large active user base, it offers good long-term monetization potential. Tencent's largest online user platform allows it to monetize other services such as payment and performance ads while its strength in mobile and PC gaming offers long-term growth opportunities.
Vipshop Holdings (Code: VIPS US) Market cap: US\$19.0 billion	Retailing	Price: US\$28.1 P/E: 18.2x P/B: 3.7x Yield: 0.0%	Vipshop is a leading online discount retailer that targets domestic Chinese consumers and sells branded products at lower prices, with the merchandise range spanning from apparel, sportswear and shoes to cosmetics. The Company's cost-cutting program from 2019, including outsourcing the parcel logistics to SF Express, improved the overall efficiency and profit. Refocusing on its core advantage in deep-discount apparel offerings also yielded success in bringing growth in customer numbers. The Company sees a retarding opportunity if it could sustain a growth of 15-20% while maintaining reasonable profitability.

Stock	Industry	Valuation (2021 Estimates)	Remarks
<p>Wuliangye Yibin (Code: 000858 CH) Market cap: US\$173.6 billion</p>	<p>Food, Beverage and Tobacco</p>	<p>Price: CNY291.9 P/E: 50.4x P/B: 12.3x Yield: 1.0%</p>	<p>Wuliangye is one of the top Chinese liquor producers, primarily targeting the mainland's domestic market. In the company's product portfolio is Luzhou-flavor liquor, Maotai-flavor liquor, Maotai-Luzhou-flavor liquor and fruit wine. Based in Sichuan Province, the baijiu maker operates with a strong brand, which shall make it stand out to ride on the expanding high-end liquor market in China.</p>
<p>China Merchants Bank (Code: 3968 HK) Market cap: US\$167.9 billion</p>	<p>Banks</p>	<p>Price: HK\$49.0 P/E: 10.6x P/B: 1.5x Yield: 3.0%</p>	<p>Founded in 1987, China Merchants Bank is one of the largest banking groups in China and is based in Shenzhen. CMB has over 70,000 employees worldwide as at the end of 2017 and more than 1,800 branches globally. Since its inception as a commercial bank, CMB has since evolved into a comprehensive banking group, with operations in commercial banking, financial leasing, fund management, life insurance and investment banking.</p>
<p>Innovent Biologics (Code: 1801 HK) Market cap: US\$14.8 billion</p>	<p>Pharmaceuticals, Biotechnology and Life Science</p>	<p>Price: HK\$82.1 P/E: N/A P/B: 17.6x Yield: 0.0%</p>	<p>Headquartered in Suzhou, China, Innovent Biologics delivers, develops, manufactures and commercializes antibody drug products for oncology, ophthalmology, immunology, and metabolic diseases. Its principal drug candidate is an anti-PD-1 monoclonal antibody for the treatment of cancer, Hodgkin's lymphoma, and esophageal carcinoma. The company also engages in the development of biosimilar drugs and bispecific antibodies In addition to the distribution of pharmaceutical products, Innovent Biologics provides consultation and research and development services.</p>
<p>Meituan Dianping (Code: 3690 HK) Market cap: US\$223.6 billion</p>	<p>Retailing</p>	<p>Price: HK\$294.6 P/E: 115.7x P/B: 13.9x Yield: 0.0%</p>	<p>Meituan Dianping is China's group buying website offering food delivery and hotel booking services at the same time. Established in Beijing and listed in Hong Kong, Meituan Dianping has grown as one of China's biggest e-commerce platforms. China's addressable consumer services market offers one of the most visible growth prospects within the Internet sector. Meituan Dianping's leading position in multiple high-frequency categories and a large user base of over 420 million provide good cross-selling opportunities.</p>

Stock	Industry	Valuation (2021 Estimates)	Remarks
Techtronic Industries (Code: 669 HK) Market cap: US\$26.1 billion	Capital Goods	Price: HK\$110.6 P/E: 31.1x P/B: 6.2x Yield: 1.3%	Techtronic Industries (“TTI”) is a global leader in designing, manufacturing, and selling home-improvement products, including power tools, outdoor power equipment and floor-care appliances. A wide range of high-output industrial tools is also among the Company’s product fleet, which has helped to underpin the constant market share gain and margin improvement and sustain long-term revenue and earnings growth. TTI benefits from a strong U.S. housing market and Home Depot sales, its innovative cordless and smart power tool products helped market share gain as well as margins expansion. Floor-care business turning around shall continuously underpin the earnings growth sustainability.

Note: The above investments made up 58.6% of Value Partners Classic Fund as at 31 December 2020. The stock prices are based on the closing of 31 December 2020.

Individual stock performance/yield is not necessarily indicative of overall fund performance.

Value Partners China Greenchip Fund Limited

NAV per share : Class A - HKD95.14 | Class A2 QDis - HKD16.03

Fund size : USD253.0 million (HKD1,961.1 million)

★★
Morningstar Rating™
As at 31-01-2021

January 2021

- Value Partners China Greenchip Fund Limited (The "Fund") invests primarily in companies established in Greater China or which derive a majority of their revenue from business related to Greater China.
- The Fund invests in China, China-related companies and medium or small capitalization companies and is therefore subject to emerging market and concentration risks. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution shares for the Fund, the Manager currently intends to make quarterly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of shares.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve medium-term capital growth by means of investing in companies established in Greater China or which derive a majority of their revenue from business related to Greater China, whether in the form of direct investment in, or trade with, Greater China. This includes companies incorporated and/or listed outside Greater China.

[^] Value Partners China Greenchip Fund Limited is one of the eligible collective investment schemes for the purpose of the Hong Kong Capital Investment Entrant Scheme (CIES). The CIES was suspended by the Hong Kong Government with effect from 15 Jan 2015 until further notice.

[#] Annualized return is calculated from inception based on published NAV.

² Refers to chain link return of Class N & Class A, Class N since inception (7 Sep 2002) to 17 Dec 2020 and Class A since 18 Dec 2020. Class N was firstly launched in 2002 & closed for subscription from 26 Mar 2007. Class A was launched on 27 Mar 2007 with the same NAV of Class N. Therefore Classes A & N have the same NAV since 27 Mar 2007. Class N was fully redeemed on 17 Dec 2020 and NAV was no longer available. Hence Class A is now the representative share class after 17 Dec 2020. For Class A, return since launch i.e. 27 Mar 2007 return and annualized return are +169.1% and +7.5% respectively.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. Hang Seng Index refers to Hang Seng Index (Price Return) up to 31 Dec 2004, thereafter it is the Hang Seng Index (Total Return). Hang Seng Index (Total Return) includes dividend reinvestment whereas Hang Seng Index (Price Return) does not take into account reinvestment of dividends. 2. MSCI China Index (Total Net Return) since fund inception to present which takes into account of dividend reinvestment after deduction of withholding tax. 3. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 4. The Manager currently intends to make quarterly dividend distribution in respect of the A2 QDis Class; actual dividend payout will be subject to the Manager's discretion. 5. The receiving bank may charge a fee for incoming payments. Such fees will reduce the actual amount of dividends received by the investor. 6. Annualized yield of QDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 4. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 7. Classification is based on Global Industry Classification Standard (GICS). 8. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. 9. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 10. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 11. Cash includes receivables and payables (except cash for collaterals and margins). 12. Investors should note that the base currency of the Fund is in HKD. Conversion to the base currency of the Fund will normally take place at the prevailing rate (as determined by the Fund's Trustee or Custodian) on the corresponding fund dealing day. Investors should be aware of possible risks resulting from fluctuations of exchange rates against USD/AUD/CAD/NZD. 13. Performance fee will only be charged if at the end of the financial year the NAV (before deduction of performance fee and relevant distributions) exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV for the accumulation classes (and dividend adjusted equivalent for distribution paying classes). If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 14. The award reflects performance up to 30 Sep 2018. 15. The award reflects performance up to 31 Dec 2017. 16. For Hong Kong investors only.

Investors should note investment involves risk. The price of shares may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. Information in this report has been obtained from sources believed to be reliable but Value Partners Limited does not guarantee the accuracy or completeness of the information provided by third parties. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you.

For Singapore investors: The Fund is registered as a restricted foreign scheme in Singapore and will only be distributed to (i) institutional investors and (ii) accredited investors and certain other persons in Singapore in accordance with section 304 and 305 of the Securities and Futures Act. China Convergence Fund

A Sub-Fund of Value Partners Intelligent Funds

NAV per unit: Class A USD - USD301.82

Fund size : USD328.1 million

Morningstar Rating™
As at 31-01-2021

January 2021

- China Convergence Fund (The "Fund") primarily invests in A and B-shares listed on the stock exchanges of Shanghai and Shenzhen as well as in H-shares listed in Hong Kong.
- The Fund invests in China and therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- The Fund may directly invest in A-shares and other eligible securities through the qualified foreign institutional investors ("QFII") quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk. In addition, the QFII policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve long-term capital appreciation by investing primarily in equity securities of China-related companies. This includes securities listed on a Mainland China stock exchange, the Hong Kong Stock Exchange and major stock exchanges in other jurisdictions. The investable universe covers, but is not limited to A, B and H-shares as well as American Depositary Receipts.

Chinese Mainland Focus Fund

A Sub-Fund of Value Partners Intelligent Funds

NAV per unit: **USD105.69**
Fund size : **USD256.2 million**

Morningstar Rating™
As at 31-01-2021

January 2021

- Chinese Mainland Focus Fund (The "Fund") invests primarily in investments which are related to mainland China.
- The Fund invests in China-related companies which involve certain risks not typically associated with investment in more developed markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- The Fund is also subject to concentration risk due to its concentration in China-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- Investing in China exposes the Fund to additional risks including currency repatriation risk, uncertainty of taxation policies and risk associated with StockConnects, RQFII Quota, SME board, ChiNext market and/or the STAR board. The Fund may also expose to RMB currency and conversion risk.
- Investing in small/mid-capitalization securities may have lower liquidity and their prices are more volatile to adverse economic developments.
- It is possible that the entire value of your investment could be lost. You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve medium to long-term capital appreciation by focusing on investments related to mainland China. This includes RMB-denominated corporate and government bonds, listed or unlisted shares issued by companies whose assets and/or revenues are principally denominated in RMB and/or whose costs or liabilities are principally denominated in US dollars. The investable universe can also cover A, B and H-shares.

Value Partners Fund Series

Value Partners China A-Share Select Fund

NAV per unit: Class A RMB (CNH) – RMB22.72

Fund size : USD77.0 million (RMB497.7 million)

Morningstar Rating™
As at 31-01-2021

January 2021

- Value Partners China A-Share Select Fund (The “Fund”) invests primarily in RMB-denominated equities in China.
- The Fund is also subject to concentration risk as a result of investing only in China. Adverse developments in such region may affect the value of the underlying securities in which the Fund invests. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund intends to invest predominantly in China A-shares directly, via its Manager’s RQFII quota. Investors will be subject to certain risks including repatriation risk, custodial risk, regulatory risk and risks associated with the Manager’s RQFII status. In addition, the RQFII policy and rules are relatively new and there may be uncertainty in implementation and such policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund and its primary investments are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The Fund may invest in debt securities including those that are below investment grade/unrated, and may involve greater risks, including credit risk, issuer-specific risk, counterparty risk and sovereign debt risk. The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk. All these may expose the Fund to significant losses.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To achieve long-term capital growth and income appreciation by predominately investing in RMB-denominated equities in the PRC utilizing the Manager’s RQFII quota.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. Performance shown is calculated based on the Fund's since launch return. 3. Classification is based on Global Industry Classification Standard (GICS). 4. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. 5. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 6. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 7. Cash includes receivables and payables (except cash for collateral and margins). 8. Performance fee will only be charged if the NAV at the end of the financial year or upon realization of units exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV. If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 9. The award reflects performance up to 30 Sep 2018. 10. The award reflects performance up to 31 Dec 2017. 11. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. NAV per unit: Class A – USD31.09

Fund size : USD90.3 million

Morningstar Rating™
As at 31-01-2021

January 2021

- Value Partners Taiwan Fund (The "Fund") invests primarily in equity and equity linked securities of companies that are listed on (a) the Taiwan Stock Exchange; or (b) the GRE Tai Securities Market; or (c) any stock exchange but which have their main operations or majority of assets in or derive the majority of their income from Taiwan.
- Investing in Taiwan-related companies involves emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty which may adversely affect volatility and market liquidity.
- The Fund is also subject to concentration risk due to its concentration in Taiwan-related companies. Adverse development in such region may affect the value of the underlying securities in which the Fund invests. The value of the Fund can be extremely volatile and could go down substantially within a short period of time.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- It is possible that the entire value of your investment could be lost. You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve long term capital growth through primarily investing in equity and equity linked securities of companies that are listed on (a) the Taiwan Stock Exchange; or (b) the GRE Tai Securities Market; or (c) any stock exchange but which have their main operations or majority of assets in or derive the majority of their income from Taiwan. This includes companies incorporated and/or quoted outside Taiwan.

Value Partners Health Care Fund

A Sub-Fund of Value Partners Ireland Fund ICAV

A UCITS-Compliant Fund ¹

NAV per unit: Class A USD Unhedged - USD18.42

Fund size : USD209.3 million

Morningstar Rating TM
As at 31-01-2021

January 2021

- Value Partners Health Care Fund (the "Fund") primarily invests in equities and equity-related securities in healthcare companies on a worldwide basis.
- The investments of the Fund are concentrated in the health care sector which are subject to greater influences from government policies and regulations than those of other industries. The value of the Fund may be more volatile than that of a fund having a more diverse portfolio of investments.
- Investing in PRC market exposes the Fund to additional risks including currency repatriation risk, uncertainty of taxation policies and risk associated with StockConnects. The Fund may also expose to RMB currency and conversion risk.
- Investing in small/mid-capitalization securities may have lower liquidity and their prices are more volatile to adverse economic developments.
- The Fund may also invest in derivatives and debt securities that are below investment grade or unrated which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this marketing material alone. Please read the prospectus for details and risk factors.

Investment objective

The Fund aims to achieve long-term capital growth by investing primarily in equities and equity related securities in healthcare companies, such as pharmaceuticals, biotechnology, healthcare services and medical technology and supplies, on a worldwide basis.

Value Partners High-Dividend Stocks Fund

NAV per unit: Class A1 USD - USD109.84 | Class A2 MDIs USD - USD12.23

Fund size : USD1,911.1 million

Morningstar Rating™
As at 31-01-2021

January 2021

- Value Partners High-Dividend Stocks Fund (The "Fund") primarily invests in higher yielding equity and debt securities in the Asian region.
- The Fund may invest in higher-yielding equity and debt securities that are below investment grade. Such investments can involve greater risks due to the speculative nature.
- The Fund may invest in China and other markets of the Asian region, therefore is subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. The value of the Fund can be extremely volatile and could go down substantially within a short period of time. It is possible that the entire value of your investment could be lost.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation to unitholders by investing primarily in a portfolio of relatively higher yielding equity and debt securities in Asian region.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk. * © Morningstar 2021. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. 1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. Investors should note that the base currency of the Fund is in USD. The HKD equivalent NAV per unit is for reference only and should not be used for subscription or redemption purpose. Conversion to the base currency of the Fund will normally take place at the prevailing rate (as determined by the Fund's Trustee or Custodian) on the corresponding fund dealing day. Investors should be aware of possible risks resulting from fluctuations of exchange rates against USD. 3. The Manager currently intends to make monthly dividend distribution in respect of the A2 MDIs Classes; actual dividend payout will be subject to the Manager's discretion. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. For A1 Class units, Manager will review dividend distribution at its discretion once a year (last dividend payout date: 21 Nov 2005). Please refer to the explanatory memorandum for more details. 4. The receiving bank may charge a fee for incoming payments. Such fees will reduce the actual amount of dividends received by the investor. 5. Annualized yield of MDIs Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 6. Classification is based on Global Industry Classification Standard (GICS). 7. The profile is based on market consensus forecast as derived from FactSet and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Portfolio yield is the weighted average of the total dividend yield of all securities in the portfolio. "Yield to maturity/put" is calculated based on the debt portion of the Fund by taking the average of yields of individual holdings (being the higher of the yield to maturity and yield to put of each bond/convertible bond) after excluding event-driven investment with extremely high yield. 8. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 9. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 10. Cash includes receivables and payables (except cash for collaterals and margins). 11. Performance fee will only be charged if at the end of the financial year the NAV (before deduction of performance fee and relevant distributions) exceeds the "high watermark", which is the all-time year-end high of the Fund's NAV for the accumulation classes (and dividend adjusted equivalent for distribution paying classes). If in any one year, the Fund suffers a loss, no performance fee can be charged in subsequent years until the loss is recovered fully (the high-on-high principle). 12. The award reflects performance up to 30 Sep 2018. 13. The award reflects performance up to 31 Dec 2017. 14. For Hong Kong investors only. Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. Information in this report has been obtained from sources believed to be reliable but Value Partners Hong Kong Limited does not guarantee the accuracy or completeness of the information provided by third parties. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you. For Singapore investors: The Fund is registered as a restricted foreign scheme in Singapore and will only be distributed to (i) institutional investors and (ii) accredited investors and certain other persons in Singapore in accordance with section 304 and 305 of the Securities and Futures Act. Value Partners Asset Management Singapore Pte Ltd, Singapore Company Registration No. 200808225G. This advertisement has not been reviewed by the Monetary Authority of Singapore. Value Partners Greater China High Yield Income Fund

NAV per unit: Class P Acc USD - USD16.11 | Class P MDis USD - USD7.23

Fund size : USD3,494.0 million

January 2021

- Value Partners Greater China High Yield Income Fund (the "Fund") primarily invests in a portfolio of fixed and floating rate bonds and other debt securities, including convertible bonds, in the Greater China region.
- The Fund may invest in high yielding securities which may be unrated or below investment grade and debt securities issued by special purpose vehicles. The Fund is therefore exposed to higher credit/insolvency risk and default risk.
- The Fund primarily invests in the Greater China region and therefore is subject to emerging market and concentration risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund.
- The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk, and may expose the Fund to significant losses.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to provide capital appreciation by primarily investing in Greater China debt securities, including but not limited to high yield, convertible and mainland Chinese offshore bonds.

Commentary

Portfolio review:

Credit spreads outperformed Treasury in January. Within credits, lower-rated high yield issues outperformed their higher-quality counterparts. In late January, we saw a reduction in risk appetite and risk assets gave up some accumulative gains from last year after Biden sworn in as the new US President. Market attention now turns to Biden's domestic policies and his stance on the US/China relationship. Our portfolio was little changed, and we continue to emphasize strong income generation and managed liquidity.

Outlook:

Year 2021 could be a year of normalization. The vaccination rate and effectiveness will greatly impact economic recovery. That said, we expect a benign global risk backdrop and consistent low yields in developed markets, which will serve as a catalyst to drive global flow into Asian credits, in particular the high yield market. Asian credit spreads remain attractive for investors seeking good relative value over developed market credits and strong income generation.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.
 1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 3. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 6. Investors should note that the Yield to worst figure is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors. A positive yield does not imply a positive return. 7. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 8. Cash includes receivables and payables (except cash for collaterals and margins). 9. Including bonds whose issuers do not seek credit ratings (Greater China Paper 13.0%; Equity-linked Investments 5.3%; Loan 3.3%; Others 3.0%). 10. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 11. The assessment of each award category is based on 3 weighted criteria, and one weighted criterion based on feedback from private banking fund selectors. The weightings includes product performance (30%), asset gathering (20%), service competency/quality (20%) and fund selector feedback (30%). 12. The awards recognize the top performing Greater China Fixed Income funds issued by CAMA/HC members with at least 1 year of historical performance as of 30 Sep 2020. The Best Total Return calculation methodology, Bloomberg calculates the customized 1 year, 3 years and 5 years total return using Bloomberg calcroute field "RT095-Custom Total Return Holding Period". 13. The award reflects performance up to 31 Dec 2019. 14. For Hong Kong investors only.
 The views expressed are the views of Value Partners Hong Kong Limited ("VPHK") only and are subject to change based on market and other conditions. Value Partners Fund Series

Value Partners Asian Total Return Bond Fund

NAV per unit: **Class A Acc USD - USD11.86** | **Class A MDis USD - USD10.21**
Fund size : **USD109.7 million**

January 2021

- Value Partners Asian Total Return Bond Fund (the "Fund") primarily invests in fixed income securities issued by any Asia Pacific governments, government agencies, supra-nationals, banks or companies which derive substantial revenue from or have significant business or economic activities in Asia Pacific or are denominated in any Asia Pacific currency.
- The Fund primarily invests in the Asia Pacific markets and therefore is subject to emerging market and concentration risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty. Adverse development in such region may affect the value of the underlying securities in which the Fund invests.
- The Fund may also invest in PRC interbank bond market via Bond Connect and is therefore subject to regulatory risks and various risks such as volatility risk, liquidity risk, settlement and counterparty risk. The relevant rules and regulations on investment in the PRC interbank bond market via Bond Connect are subject to change and may adversely impact the Fund.
- The Fund may invest in high yielding securities which may be unrated or below investment grade and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk.
- In respect of the distribution shares for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per share of the Fund.
- You should not make investment decision on the basis of this marketing material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To provide a competitive total return, consisting of income and capital growth over the medium to longer term, by investing primarily in fixed income securities issued by an Asia Pacific governments, government agencies, supra-nationals, banks or companies which derive substantial revenue from or have significant business or economic activities in Asia Pacific or are denominated in any Asia Pacific currency.

Currency breakdown

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fts@vp.com.hk.

1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 3. Annualized yield of MDIs Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Investors should note that Yield to worst is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors, nor does a positive yield imply a positive return. 6. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 7. Cash includes receivables and payables (except cash for collaterals and margins). 8. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 9. The assessment of each award category is based on 3 weighted criteria, and one weighted criterion based on feedback from private banking fund selectors. The weightings includes product performance (30%), asset gathering (20%), service competency/quality (20%) and fund selector feedback (30%). 10. The ranking for top investment houses in Asian G3 bonds is generated from the number of votes received from the top-rated analysts, economists, strategists, salespeople and traders, for investors in these institutions. The score is also subject to a weighting methodology determined by the rating of the individual casting the vote for the investor. A total of 430 different institutions were evaluated and shortlisted to produce the 2020 ranking. 11. The award reflects performance up to 31 Dec 2019. 12. For Hong Kong investors only. Investors should note investment involves risk and past performance is not indicative of future results. Investors should refer to the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets, non-investment grade and unrated debt securities. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you. Value Partners Fund Series

Value Partners Asian Fixed Maturity Bond Fund 2022

NAV per unit: USD9.95 (Class A MDis USD)

Fund size : USD26.1 million

January 2021

- Value Partners Asian Fixed Maturity Bond Fund 2022 (The "Fund") invests primarily in a buy-and-hold portfolio of fixed income securities in Asia over an investment period of 3 years from the Fund launch date on 22 November 2019 up to the Fund's maturity date, which is expected to be on or around 18 November 2022 ("Maturity Date").
- The duration of the Fund is limited (i.e. up to the Maturity Date) and will be terminated automatically at maturity. Neither income, return nor capital of the Fund is guaranteed or protected. There are risks that investors may not recoup the original amount invested in the Fund during the investment period as well as at the Maturity Date.
- The issuers of fixed income instruments may repay principal before the maturity of the instruments. Prepayments may cause losses on instruments purchased at a premium. Unscheduled prepayments for fixed income instruments issued at par may result in a loss equal to any unamortised premium. Repayment of principal before the Fund's maturity as well as the re-investment of cash proceeds from the sale of fixed income instruments where a potential deterioration of credit profiles is anticipated by the Manager create out of market risk and the uncertainty of gaining access to fixed income instruments delivering similar yield to maturity resulting in lower interest income and returns to the Fund.
- In case of substantial redemptions within a short period of time, the Fund may need to liquidate some positions prematurely at an inopportune time or on unfavourable terms. The value of the Fund may therefore be adversely affected. In addition, the resulting decrease in the size of the Fund may immediately increase the ongoing charges of the Fund and may have an adverse impact on investors' return. Substantial redemptions may render the size of the Fund to shrink significantly and trigger the Fund to be early terminated.
- The Fund is subject to early termination risk. Upon the termination of the Fund, all the assets of the Fund will be realised and the net proceeds thereof which are available for distribution will be distributed to relevant unitholders. Investors should note that the amount distributed to them may be less than the amount of their initial investment.
- The Manager may at its discretion extend the Initial Offer Period ("IOP") (4 November 2019 to 21 November 2019) or not to issue any units. If the Manager decides not to proceed with the launch, any subscription monies shall be promptly returned to investors in full (without any interest) less any applicable bank charges, after the close of the IOP. The Fund will also be closed to subsequent subscriptions after the IOP and no subsequent subscription to the Fund will be accepted.
- The Fund is subject to geographical concentration risks, the value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting Asia (in particular China) market.
- Investors should note the emerging markets risk, currency and foreign exchange risk, and concentration risk and risks relating to fixed income instruments: (a) credit/counterparty risk; (b) interest rates risk; (c) volatility and liquidity risk; (d) credit rating downgrading risk; (e) credit ratings risk; (f) sovereign debt risk; (g) valuation risk.
- Financial derivative instruments may be used for hedging. The use of derivatives may become ineffective and the Fund may suffer significant losses.
- In respect of the distribution classes for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per unit of the Fund.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund targets to provide investors with stable income and total return by investing in a portfolio of fixed income securities in Asia over an investment period of approximately 3 years from the close of initial offer period up to the maturity date. The Fund is not a guarantee or capital protected product.

Source: HSBC Institutional Trust Services (Asia) Limited, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. Classification is based on Bloomberg industry group. 2. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 3. Cash includes receivables and payables (except cash for collaterals and margins). 4. Investors should note that the Yield to worst figure is for reference only and does not represent the actual performance of the Fund or the dividend yield received by investors. A positive yield does not imply a positive return. 5. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 6. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 7. Annualized yield based on Initial offer price of MDIs Class is calculated as follows: (Latest dividend amount/Initial offer price) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 8. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 9. The assessment of each award category is based on 3 weighted criteria, and one weighted criterion based on feedback from private banking fund selectors. The weightings includes product performance (30%), asset gathering (20%), service competency/quality (20%) and fund selector feedback (30%). 10. The ranking for top investment houses in Asian G3 bonds is generated from the number of votes received from the top-rated analysts, economists, strategists, salespeople and traders, for investors in these institutions. The score is also subject to a weighting methodology determined by the rating of the individual casting the vote for the investor. A total of 430 different institutions were evaluated and shortlisted to produce the 2020 ranking. 11. The award reflects performance up to 31 Dec 2019. 12. For Hong Kong investors only.

Investors should note that investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets, non-investment grade and unrated bonds. Investors should seek advice from a financial adviser before making any investment. In the event that you choose not to do so, you should consider whether the investment selected is suitable for you.

For Singapore investors: The Fund is registered as a restricted foreign scheme in Singapore and will only be distributed to (i) institutional investors and (ii) accredited investors and certain other persons in Singapore in accordance with section 304 and 305 of the Securities and Futures Act. Value Partners Asset Management Singapore Pte Ltd, Singapore Company Registration No. 200808225G. This advertisement has not been reviewed by the Monetary Authority of Singapore.

This document has not been reviewed by the Securities and Futures Commission in Hong Kong. Issuer: Value Partners Hong Kong Limited.

NAV per unit: Class A Acc USD - USD12.44

Fund size : USD61.7 million

January 2021

- Value Partners Multi-Asset Fund (The "Fund") aims to achieve capital growth by investing across a range of asset classes and currencies globally including equities, debt securities, commodities, collective investment schemes, listed exchange traded funds ("ETFs"), real estate investment trusts ("REITs") and money market instruments which are primarily linked to the global trend of economies.
- The Fund adopts a dynamic asset allocation strategy which may be periodically rebalanced and therefore the Fund may incur greater transaction costs than a fund with static allocation strategy.
- The Fund may invest in small and mid-capitalization companies and emerging markets and therefore subject to higher volatility and lower liquidity in general.
- The Fund may invest in debt securities which may be unrated or below investment grade and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk, and may expose the Fund to significant losses.
- The Fund may invest in contingent convertible bonds which are risky and highly complex instruments. These instruments may be subject to conversion risk e.g. compulsory conversion by the issuer upon uncontrollable triggering events and hence the Fund may experience losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to achieve capital growth by investing in global markets which are primarily linked to the global trend of economies. Currently it primarily invests in Asian markets, with a particular focus on China equities, fixed income securities (investment-grade and high-yield) and other alternative income sources to capture opportunities across different market cycles.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. Effective 19 Jun 2018, the Fund has been changed from a fund of funds investing in multi-assets to a multi-asset fund and therefore the investment objective and policies have also been changed. Performance prior to 19 Jun 2018 was achieved under circumstances that no longer apply. Please refer to the offering document for details. 2. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 3. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 4. Annualized yield of MDis Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 5. Classification is based on Global Industry Classification Standard (GICS). 6. Portfolio yield is based on market consensus forecast as derived from FactSet and Bloomberg and is the weighted average of the total dividend yield of all securities in the portfolio. 7. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 8. Exposure refers to net exposure (long exposure minus short exposure). Derivatives e.g. index futures are calculated based on P/L instead of notional exposure. 9. The awards recognize the top performing Multi-Asset Allocation funds issued by CAMAHK members with at least 1 year of historical performance as of 30 Sep 2020. The Best Total Return calculation methodology, Bloomberg calculates the customized 1 year, 3 years and 5 years total return using Bloomberg calcroute field "RT095-Custom Total Return Holding Period". 10. For Hong Kong investors only.

Investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. The information provided does not constitute investment advice and it should not be relied on as such. All material has been obtained from sources believed to be reliable, but its accuracy is not guaranteed.

Value Partners Fund Series

Value Partners Asian Income Fund

NAV per unit: Class A USD Acc - USD13.26 | Class A USD MDis - USD11.23

Fund size : USD140.0 million

January 2021

- Value Partners Asian Income Fund (The "Fund") invests primarily in Asian equity and/or fixed income securities including convertible bonds and to deliver lower portfolio volatility.
- The Fund is subject to concentration risk as a result of the concentration of its investments in the Asian markets. The Fund may be more volatile than a broadly based fund as it is more susceptible to fluctuation in value resulting from adverse conditions in the Asian market.
- The Fund may invest in small and mid-capitalization companies. The stocks of such companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalization companies in general.
- The Fund may invest in debt securities including those that are below investment grade/unrated, and may involve greater risks, including credit risk, issuer-specific risk, counterparty risk and sovereign debt risk. The Fund may also invest in derivatives which can involve material risks, e.g. counterparty default risk, insolvency or liquidity risk. All these may expose the Fund to significant losses.
- Investment in fixed income securities may include contingent convertible bonds whose structure is innovative and untested. These instruments may be subject to conversion risk e.g. compulsory conversion by the issuer upon uncontrollable triggering events and hence the Fund may experience losses.
- In respect of the distribution units for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

The Fund aims to maximize return and income by investing in Asian equities, Asian fixed income securities and other assets relating to Asian companies that are listed in Asia, or have registered offices in Asia or generate a predominant share of their sales and/or their profits in Asia. The Fund also aims to achieve lower portfolio volatility by actively screening and selecting a combination of lower volatility equities and fixed income securities.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

1. Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. 2. The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. 3. Annualized yield of MDIs Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. 4. Classification is based on Global Industry Classification Standard (GICS). 5. Portfolio yield is based on market consensus forecast as derived from FactSet and Bloomberg and is the weighted average of the total dividend yield of all securities in the portfolio. 6. Volatility is a measure of the theoretical risk in terms of standard deviation, based on monthly return over the past 3 years. 7. Equities are classified by country of listing and fixed income securities are classified by country of risk. 8. Cash: 4.8%, includes receivables and payables (except cash for collaterals and margins). 9. Including bonds whose issuers do not seek credit ratings. 10. The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. 11. The assessment of each award category is based on 3 weighted criteria, and one weighted criterion based on feedback from private banking fund selectors. The weightings includes product performance (30%), asset gathering (20%), service competency/quality (20%) and fund selector feedback (30%). 12. The ranking for top investment houses in Asian G3 bonds is generated from the number of votes received from the top-rated analysts, economists, strategists, salespeople and traders, for investors in these institutions. The score is also subject to a weighting methodology determined by the rating of the individual casting the vote for the investor. A total of 430 different institutions were evaluated and shortlisted to produce the 2020 ranking. 13. The award reflects performance up to 31 Dec 2019. 14. For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. Information herein has been obtained from sources believed to be reliable but Value Partners Hong Kong Limited does not guarantee the accuracy or completeness of the information provided by third parties. Value Partners Fund Series

Value Partners Asian Innovation Opportunities Fund

NAV per unit: Class A USD Acc - USD17.61 | Class A USD MDIs - USD17.22

Fund size : USD70.7 million

January 2021

- Value Partners Asian Innovation Opportunities Fund (the "Fund") invests predominantly in Asian equity and/or fixed income securities of companies that are related to innovative technologies or business innovations.
- The Fund's investments are concentrated in the Asian market and therefore subject to emerging market risks. Generally, investments in emerging markets are more volatile than investments in developed markets due to additional risks relating to political, social, economic and regulatory uncertainty.
- The Fund is also subject to concentration risks due to its concentration in the sectors relating to innovative technology or business innovation. Such companies are characterised by relatively higher uncertainty and volatility in price performance when compared to other economic sectors.
- The Fund may invest in small and mid-capitalisation companies. The stocks of such companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general.
- The Fund may invest in unrated or below investment grade bonds and financial derivative instruments. The Fund is therefore exposed to additional risks, including volatility risk, valuation risk, leverage risk, liquidity risk, correlation risk, counterparty/credit risk, legal risk, over-the-counter transaction risk and settlement risk.
- In respect of the distribution classes for the Fund, the Manager currently intends to make monthly dividend distribution. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the Fund. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease of the net asset value per unit of the Fund.
- You should not make investment decision on the basis of this material alone. Please read the explanatory memorandum for details and risk factors.

Investment objective

To maximise return and income by investing primarily (i.e. not less than 70% of its Net Asset Value) in Asian equity and/or fixed income securities relating to Asian companies that are listed, or have their registered offices in Asia or that generate a predominant share of their sales and/or their profits in Asia which are related to innovative technologies or business innovations including but not limited to information technology, consumption services, healthcare and financials.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated on NAV to NAV in base currency with dividend reinvested and net of fees. All indices are for reference only. Our portfolio disclosure policy can be obtained from the Investment Manager upon request to email fis@vp.com.hk.

¹ Each hedged share class will hedge the Fund's base currency back to its currency of denomination on a best efforts basis. However, the volatility of the hedged classes measured in the Fund's base currency may be higher than that of the equivalent class denominated in the Fund's base currency. The hedged classes may be suitable for investors who wish to reduce the impact of changes in exchange rates between their local currency and the Fund's base currency. ² The manager intends to declare and pay monthly dividends equal to all or substantially all of the net income attributable to each of the Distribution Classes. However, there is neither a guarantee that such dividends will be made nor will there be a target level of dividend payout. No dividends will be paid with respect to the Accumulation Classes. Distribution may be paid from capital of the Fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount that have been originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units. Please refer to the Explanatory Memorandum for further details including the distribution policy. ³ Annualized yield of MDIs Class is calculated as follows: (Latest dividend amount/NAV as at ex-dividend date) x 12. Investors should note that yield figures are estimated and for reference only and do not represent the performance of the Fund, and that there is no guarantee as to the actual frequency and/or amount of dividend payments. ⁴ Classification is based on Global Industry Classification Standard (GICS). ⁵ Portfolio yield is based on market consensus forecast as derived from FactSet and Bloomberg and is the weighted average of the total dividend yield of all securities in the portfolio. ⁶ Equities are classified by country of listing and fixed income securities are classified by country of risk. ⁷ Cash: 5.4%, includes receivables and payables (except cash for collaterals and margins). ⁸ The letter rating, which may be based on bond ratings from different agencies, is provided to indicate the average credit rating of the portfolio's underlying investments without taking into account derivative positions. Issuer rating may be used for unrated securities. The average credit rating is determined by assigning a sequential integer to all credit ratings from AAA (highest) to D (lowest), taking a simple, asset-weighted average of debt holdings by market value and rounding to the nearest rating. As the risk of default increases disproportionately as a bond's rating decreases, the simple weighted average of credit ratings is not a statistical measurement of the portfolio's default risk. ⁹ The award reflects performance up to 31 Dec 2019. ¹⁰ The Asset Benchmark Research Awards 2019 judged performance of top investment houses based on the number of votes from top-rated analysts, economists and strategists. ¹¹ The award reflects performance up to 30 Sep 2018. ¹² For Hong Kong investors only.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the explanatory memorandum for details and risk factors in particular those associated with investment in emerging markets. The only ETF backed by physical gold stored in Hong Kong

January 2021

- Value Gold ETF (the "Fund") is a fund listed on the Stock Exchange of Hong Kong Limited ("SEHK"), which aims to provide investment results that closely correspond to the performance of the London Bullion Market Association Gold Price.
- The Fund only invests in bullion and may experience greater volatility due to single economic, market or political occurrences when compared to diversified mutual funds or unit trusts.
- The Fund has adopted a multi counter and units are traded in HKD, RMB and USD on SEHK. The nature of the multi-counter may make investment in the units riskier than in single counter units or shares of an SEHK listed issuer. Investors without RMB or USD accounts may buy and sell HKD traded units only.
- RMB is not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The Fund does not insure its bullion and the Fund and unitholders could suffer a loss if the bullion held by the custodian is lost or damaged.
- As the Fund is not actively managed, the Manager will not adopt a temporary defensive position against any market downturn. Investors may lose part or all of their investment.
- Trading prices of units on the SEHK are subject to market forces and the units may trade at a substantial premium/discount to the net asset value of the Fund.
- You should not make investment decision on the basis of this material alone. Please read the prospectus for details and risk factors.

Investment objective	
The Fund aims to provide investment results that, before fees and expenses, closely correspond to the morning (London time) fixing price of gold per troy ounce quoted in US dollars, published by the London Bullion Market Association (LBMA). The trust is fully backed by physical gold stored in Hong Kong.

Source: HSBC Institutional Trust Services (Asia) Limited and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is calculated in base currency, NAV to NAV with dividend reinvested and net of fees.
1. BENCHMARK aggregates 12 monthly score sets for each fund between 1 Oct 2018 and 30 Sep 2019, and between 1 Oct 2017 and 30 Sep 2018, respectively. Monthly score sets are calculated by aggregating the 12-monthly rolling one-year, three-and five-year (USD) returns, and by adding a risk score for their risk-adjusted returns. Funds in the final score set with a negative Sortino ratio will be excluded from the assessment for the awards. 2. The management fee is a single flat fee to cover all of the Custodian's fee, Trustee's and Registrar's fees and other costs and expenses. Please refer to the Prospectus for details.
Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the prospectus for details and risk factors, particularly those associated with the arrangement in the event that the Fund is delisted. The Fund's prospectus is available and may be obtained from website. Investors should also note that the Fund is different from a typical retail investment fund. Units in the Fund may only be created or redeemed directly by a participating dealer in large unit sizes.
